

Technology Request

Title: Market technology for production of recyclable paper plates conforming to applicable EU eco standards (Ref: 08 BG BGAR OJM3)

Abstract:

A Bulgarian private paper processing company is looking for cost-effective technology for production of recyclable paper plates. The plates produced under such technology must conform to applicable EU ecology standards. The company is looking for license or commercial agreement with technical assistance.

Description:

The complete technology solution for production of recyclable paper plates should feature an innovative solution for quality and cost-effective production of recyclable paper plates used in household and the public food and fast food sector. The recyclable plates produced under such technology must be cost-effective and conform to applicable EU ecology standards.

Technical Specifications / Specific technical requirements of the request

The recyclable plates produced under such technology must conform to applicable EU ecology standards. The company seeks modern technology, implemented in EU countries for quality recyclable paper plates, whereas the technology solution offered should be cost-effective and up-to date with comparison to current technologies implemented in EU countries.

Current and Potential Domain of Application

The recyclable paper plates produced under the technology should be applicable in household and the public food and fast-food sector.
